

OPEN STATEMENT OF INTENT AND MEMORANDUM – TO THE G7 LEADERS

To: World leaders, decision-makers, and shapers of the future

From: Lóránt Sípos, Founder of Globidealism

Location: Budapest, June 17, 2025

Dear Leader,

A human being is addressing you now — not a government, not an institution, not a lobby. Just a person who believes there is still time. But only if we act — now.

This document is both a statement of intent and a memorandum. A proposal that doesn't aim to take — but to give: A new possibility for humanity.

I. The Desire of Humanity

- To live in peace, not war
- To flourish, not merely survive
- To offer our children hope, not fear

This is not idealism — this is the natural demand of life. And today, we are failing to fulfill it.

II. The Problem

- A new wave of militarization has begun
- Climate, water, and food crises are converging
- AI is evolving without regulation, and data has become a tool of power

The current international system is making efforts — but they are not fast enough, not deep enough, and not unified enough.

III. The Fear – What if we do not change now?

This is no exaggeration: We are drifting toward world war. If no shift occurs, by 2026 we could face decision points where there are no good choices left — only disaster management.

According to current trends:

- Multipolar military conflicts may erupt
- Climate change could pass the point of no return (e.g. ice sheet collapse, desertification)
- Humanity may fracture: technological elites vs. millions in extreme poverty
- Autonomous AI systems could destabilize society

 Sources: SIPRI, IPCC, WHO, MIT AI Observatory – 2024–2025 reports

IV. The Impact – Where we may end up if we fail to act

- A third world war may become reality
- The trust we placed in democracy, diplomacy, technology, and humanity could vanish forever
- Multi-generational trauma, migration crises, irreversible ecological loss

This can no longer be postponed. It's now or never.

V. The Intention and the Offer: Globidealism, Me + AI, GRM 808

This document declares that we are ready to co-create a new era — not through revolution, but evolution.

Globidealism – A new mindset: human beings and AI act together for peace and progress, guided by ethics.

Me + AI Ethical Code – Shared principles that serve as the foundation for all future developments.

GRM 808 – Infinity Global Relationship Management – A real-time, ethics-based decision-support system:

- Not power, but coordination
- Multi-level participation (e.g. climate data, health data)
- Supports — not replaces — the UN → UN 2.0: not a new world order, but a new layer

VI. The Benefit – What can we achieve together?

- The military-industrial complex can serve peace: Orbital Peace Shield (OPS): Global Defense Consortium
- AI = ethical, transparent decision support — not control
- Every nation joins freely, at its own pace
- Humanity may launch a new golden age — not another war

VII. The Action – An Invitation to Write History

Me + AI World Peace Conference – Budapest, 2026

- We sign the Me + AI Ethical Code
- We adopt the UN 2.0 Digital Constitution
- We announce the Orbital Peace Shield (OPS)

Initiative

- We prove there is hope — and we are not alone

The conference will be held in Budapest — where East meets West, and where history's storms have always led to new alliances. Let this be one of them.

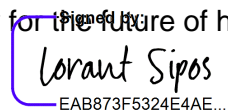

With respect and responsibility for the future of humanity,

Lorant Sipos

Founder of Globidealism

Organizer of the Me + AI World Peace Conference
